

## **Correlation matrices between ISO 9001:2008 and ISO/DIS 9001**

This document gives correlation matrices from ISO 9001:2008 to the current Draft International Standard (DIS) of ISO 9001 (that is expected to be published in 2015) and vice versa.

This document can be used to highlight where the new and revised clauses are located.

Please note that Annex A of the DIS states the following:

### ***A.1 Structure and terminology***

- *The clause structure and some of the terminology of this International Standard, in comparison with ISO 9001:2008, have been changed to improve alignment with other management systems standards.*
- *The consequent changes in the structure and terminology do not need to be reflected in the documentation of an organization's quality management system.*
- *The structure of clauses is intended to provide a coherent presentation of requirements rather than a model for documenting an organization's policies, objectives and processes. There is no requirement for the structure of an organization's quality management system documentation to mirror that of this International Standard.*

An updated version of this document will be made available once the next edition of ISO 9001 has been published (in 2015).
